With the end of another successful year, Buckles & Associates, Inc. is looking forward to the upcoming busy season. 2012 marked eight years of growth, development and prosperity for Buckles & Associates, Inc., all of which have been made possible thanks to the continued support of their clients. Within those eight years, all seven offices throughout the west coast have established a reputation in the construction defect industry based on integrity and honesty. Buckles & Associates, Inc. is committed to continuing to serve their clients with the utmost professionalism in the new year as well.

Colorado News

The Colorado office now has its first licensed architect in house, Matthew Friesleben! Matt has been working with Buckles & Associates, Inc. since 2010. He earned both his Bachelor's Degree and Master's Degree in Architecture from the University of Kansas. Recently, he was granted his architectural license in the state of Colorado in October. In the midst of working full time and taking care of his new family, Matt found time to study and pass all of his examinations the first time through. Buckles & Associates, Inc. could not be more proud of his huge accomplishment!

Condorminiums 2.0

The latest design work is ongoing for one of Buckles & Associates, Inc.'s most memorable projects, the Condor Breeding Facility at the San Diego Zoo's Wild Animal Park (appropriately referred to as the 'Condorminiums'). After the 2007 Witch Fire roared through the San Diego Zoo's Wild Animal Park, the facility used for housing and breeding of the Condors was left in ashes. Buckles & Associates, Inc. was hired to design, permit and reconstruct the 'Condorminiums' on a fast track basis to complete the facility in time for the start of the endangered Condor breeding season.

B&A did such a great job with this project, that they were recently hired again to design and construct new upgrades and additions to the facility. Now that the Condors are safe and comfortably housed, the B&A team is working to design a state of the art facility which they are calling the 'Condorminiums 2.0'. Buckles & Associates, Inc. feels privileged to be part of this project and is eager to wrap up the design work and begin the construction process. Guests at the zoo can look forward to the upgraded 'Condorminiums' in the near future.

Pacific Northwest News

Over the past 8 years, Buckles & Associates, Inc. has made a great impact on the construction defect industry with new offices opening all over the West Coast. Lately, B&A has been in high demand in the Pacific Northwest which has sparked the company's interest in making their services as readily available as possible for their clients. Talks of opening new offices in the area are underway. In Portland news, Buckles & Associates, Inc. is proud to announce that they have obtained their License in the state of Oregon! Keep them in mind for any type of projects you may have.

Construction Corner

Since the opening of Buckles Restoration, the company has made great achievements in the restoration industry. Most recently, B.R. worked with the Tunnel to Towers Foundation to build a "smart home" for U.S. Marine Cpl. Juan Dominguez, a

triple amputee who was injured during his service in Afghanistan. The well deserving veteran now has a beautiful home in Temecula, CA and Buckles Restoration is honored to have been a part of this special project. Also, a national developer has relied on Buckles Restoration to complete SB800 repairs on over 100 single family homes. B.R. provides 24/7 emergency services and SB800 repairs along with knowledgeable and neighborly customer service throughout Riverside and North San Diego Counties.
